md64, saaba, crypto_sign, open time, signature size, excerpt for NIST Post-Quantum Cryptography Standardization Project

Horizontal axis: Time (cycles) to generate a message given a signed message (crypto_sign_open).
Vertical axis: Space overhead (bytes) for signing a long message (at most crypto_sign_BYTES).

This chart shows the performance of various cryptographic algorithms, with horizontal axis representing time (cycles) and vertical axis representing space overhead (bytes). The SUPERCOP database does not list constant time as a goal for this implementation.
